The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/572,345	Applicant(s) BRUNET ET AL.	
	Examiner NANCY T. LE	Art Unit 3621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/10/2009 has been entered.

Status of Claims

Claims 20, 21, 23-32, 34-39 are currently pending and have been examined.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 20, 21, 23-32, 34-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 2004/0039651 A1 (Grunzig et al.; hereinafter “Grunzig”).

Grunzig discloses a method for carrying out an electronic transaction, having the following steps:

performing a data interchange is between a first network subscriber node and a second network subscriber node with a first terminal at the first network subscriber node via a first communication network for stipulating transaction data for the transaction;

inputting an identification number for a second terminal at the first network subscriber node in a second communication network, different than the first, into the first terminal at the first network subscriber node by the first network subscriber node;

transmitting the identification number and the transaction data from the first network subscriber node to a third network subscriber node via a third communication network;

verifying the validity of the identification number by the third network subscriber node, and identifying an associated service provider node from a plurality of service provider nodes registered with the third network subscriber node using the identification number;

Art Unit: 3621

transmitting the verified identification number and the transaction data from the third network subscriber node to the associated service provider node via a fourth communication network;

transmitting a credit stipulated by the transaction data is reserved at the associated service provider node for the second network subscriber node by debiting an account at the first network subscriber node, which account is managed at the associated service provider node for the identification number, and

confirming the reserved credit by the associated provider node to the third network subscriber node via the fourth communication network;

generating a transaction number and transmitting the transaction number from the third network subscriber node to the second terminal at the first network subscriber node via the second communication network;

inputting the transmitted transaction number into the first terminal at the first network subscriber node and the input transaction number is transmitted to the third network subscriber node via the third communication network;

verifying the transmitted transaction number by the third network subscriber node by comparing it with the transaction number generated previously by the third network subscriber node; and

confirming the credit reserved by the associated service provider node by the third network subscriber node to the second network subscriber node via the third communication network;

Art Unit: 3621

(see at least Abstract, paragraphs 0001, 0002, 0008, 0010, 0012, 0015 - 0024, 0026 - 0045).
